

TUTORING / TRAINING

Quality Tutoring Services, through the department of Veterans Affairs, has been assisting our United States Veterans in their educational endeavors since 2008. We tutor in mostly all required academic subjects.

Veterans requiring tutoring services should consult with his/her Vocational Rehabilitation counselor at the Department of Veterans Affairs in order for our center to be issued a 1905 form requesting services. As soon as QTS receives the tutoring request form 1905, a tutor will be assigned. The tutor will contact the Veteran listed on the form and will arrange for tutoring dates and times, and location.

Tutoring is a very convenient, private and effective way to improve the student's academic and intellectual proficiency. We can help with problem solving, improve homework skills, time management, self-confidence and preparation for exams in an efficient timely manner.
